

MAKE YOUR WEATHER DECISION WHILE YOU STILL HAVE A CHOICE.

It's better to arrive a little late in this world, than early in the next!

BE A WISE PILOT.

BEFORE TAKEOFF

- Get all available weather information.
- Prepare for the worst and plan alternatives.
- File a flight plan or flight itinerary.
- Leave a margin for error or the unexpected—take ample fuel reserves.

WHILE AIRBORNE

- Keep an eye on the weather.
- Monitor broadcasts and ask for updates.
- Don't push your limits.
- Make your diversion or land decision early.
